# TELECO TELAIR Motosat Kit - Knob with Electric Motor for VOYAGER

Reference: 13027

**TELECO TELAIR Motosat Kit - Knob with Electric Motor for VOYAGER**

This kit allows you to transform an existing manual Voyager system into a semi-automatic system.

The inclination of the dish can now be adjusted using two buttons, and the display shows the correct inclination to quickly locate the desired satellite.

Images and technical data are not binding.
