

CUMMINS ONAN 0300-4686-01 Low coolant level safety shut-off switch

Reference: 0300-4686-01

CUMMINS ONAN 0300-4686-01 Low coolant level safety shut-off switch

Low coolant level safety shut-off switch

Description

Provides continuous monitoring of the coolant level in the engine block.

If the level falls below a pre-set level for more than 10 seconds the genset control activates a shutdown and indicates fault code 59.

Operator should repair any leak and add coolant as appropriate.

Please use operator's manual instructions for adding coolant.

Benefits

The genset is equipped with a recovery bottle with recommended coolant level indication gauge.

The switch adds additional protection against operation with low coolant level.

Compatibility

This kit is for use with:

MDKBK/L/M/N (not with dry exhaust)

MDKBP/R/V/T/U

Kit Includes

Switch assembly, 3/4 in to 1/4 in NPT reducer bushing and instruction sheet.
