

## DOMETIC COOLMATIC CRX 65 Compressor refrigerator 12/24 Volt DC

Reference: 9105306568

### DOMETIC COOLMATIC CRX65 VEHICLE REFRIGERATOR

Dometic CoolMatic CRX65 is a multifunctional compressor refrigerator, for use in vehicles with a maximum capacity of up to 57l.

Dometic CoolMatic CRX65 is truly multifunctional, as it can serve as a fridge, fridge/freezer or freezer. This patented invention is distinguished by its removable freezer cell and smart electronic solutions, which regulate the compressor speed while saving energy. The freezer cell can be removed to increase available space, while the desired temperature is set manually.

Dometic CoolMatic CRX65 uses a fridge that transitions from a liquid to a gaseous state in the evaporator. The evaporation process draws heat from inside the refrigeration unit, causing the temperature to drop. The compressor draws in the refrigerant, compresses it, and conveys it to the condenser. From here, the absorbed heat is released into the environment. Then the refrigerant returns to a liquid state and to the evaporator, where the cycle begins again. The result is excellent refresh, capable of freezing even at extreme ambient temperatures.

Dometic CoolMatic CRX65 offers the incredible versatility of a 3-in-1 solution, as it can be used as a fridge, a freezer or a combination of both. It allows you to set the desired temperature via a soft-touch control panel, mounted flush in the interior wall.

Dometic CoolMatic CRX65 also features intelligent electronics with automatic adjustment of fan speed based on room temperature: full speed for high temperatures, low speed and exceptionally quiet operation when room temperature is low.

Thanks to the compressor speed adjustment system, it provides energy savings of up to 25% and incredibly quiet operation. The innovative door lock not only keeps the door securely closed while traveling on bumpy roads, but also acts as a ventilation point.

#### DOMETIC COOLMATIC CRX65 TECHNICAL FEATURES

Product Description: Compressor fridge  
Product material: Stainless steel effect  
Input voltage, direct current: 12/24 V  
Climatic class: T  
Air humidity: maximum 90%  
Momentary drift: 30° maximum  
Refrigerant: R134a  
Refrigerant quantity: 42 g  
Useful volume: 57 Lt  
Freezer volume: 7 Lt  
Length: 545 mm  
Width: 448 mm  
Height: 525 mm  
Weight: 19 Kg
