Phoenix P 50 in AISI 316

Pneumatic pump, in stainless steel, suitable for both salt water and food products, in a-toxic material Phoenix SS 50 in AISI 316.

I would like to point out that the flow emitted by an AODD compressed air pump is of the "pulsing" type, i.e. the liquid is delivered in flocs. If the customer needs to homogenize the flow, obtaining a more harmonic delivery, it is necessary to apply a pulsation damper, called Damper.

Technical Sheet

Power (kW)	2.2
Pump type	Elettropompa verticale
Fluid type	Waste waters
Maximum output capacity (Lt/min)	133
Pressure (bars)	7
Total head (m)	114
