BM2 M130 HIGH PRESSURE CLEANER

The BM2 M130 High Pressure Washer is an innovative and highly efficient device designed to ensure powerful and precise cleaning in various contexts. Its vertical structure, ergonomic and easy to handle, allows for comfortable use and easy movement, making it ideal for both domestic and professional use.

The BM2 M130 is equipped with an axial pump with stainless steel pistons and an aluminum head specifically designed. This configuration ensures long-lasting durability and optimal resistance to corrosion, maintaining high performance over time.

One of the strengths of the BM2 M130 is the total stop system (TS) when releasing the trigger, which not only ensures safe use but also greater energy efficiency, preventing waste when the pressure washer is not in use. Additionally, the thermal motor protection ensures that the device does not overheat, guaranteeing a longer operational life.

To facilitate use, the BM2 M130 is equipped with a quick connector for water connection, simplifying the operations of connecting and disconnecting the hose. The rubber wheels offer effortless mobility on various surfaces, while the integrated hose reel keeps the hose tidy and ready for use, avoiding clutter and potential damage.

From a technical perspective, the BM2 M130 is a single-phase machine with a frequency of 50 Hz and a voltage of 230 V. The maximum pressure reaches 130 bar (13 MPa or 1880 psi), with a maximum flow rate of 360 liters per hour. The axial pump operates at a speed of 2800 RPM, ensuring effective and rapid cleaning.

The BM2 M130 High Pressure Washer absorbs a maximum power of 1.7 KW and operates with a power supply of 230 V at 1 phase and 50 Hz. It can handle a maximum water supply temperature of up to 40°C. The compact dimensions of 320 mm in length, 280 mm in width, and 850 mm in height, combined with a weight of only 12 kg, make this pressure washer easy to transport and store.

In terms of logistics, the BM2 M130 is designed to be efficient even in distribution, with a capacity of 24 pieces per pallet, optimizing space during transport and storage.

In summary, the BM2 M130 High Pressure Washer is a versatile, robust, and high-quality product, perfect for those seeking a powerful and reliable cleaning solution. Thanks to its advanced features and durable construction, it represents a secure investment for any intensive cleaning needs.

Technical Specifications BM2 M130:

Phase type: Single-phase

Frequency: 50 Hz
Voltage: 230 V
Maximum pressure: 130 bar - 13 Mpa - 1880 psi
Maximum flow rate: 360 Lt./h
Pump: Axial
Stop system: TS
Pump speed: 2800 rpm
Maximum absorbed power: 1.7 KW
Supply voltage: 230 V - 1ph - 50Hz
Maximum inlet temp: 40 °C
Pallet quantities: 24 pcs
Length: 320 mm
Width: 280 mm
Height: 850 mm
Weight: 12 Kg.

Technical Sheet

| | |
|----------------------------------|--------------------|
| Phase | Single phase |
| Frequency (Hz) | 50 |
| Voltage (V) | 230 |
| Pump type | AXIAL |
| Maximum output capacity (Lt/min) | 360 |
| Transportability | Wheels and handles |
| Length (mm) | 320 |
| Width (mm) | 280 |
| Height (mm) | 850 |
| Feed Type | 230V - 1ph - 50Hz |
| maximum water temperature (°C) | 40 |
| Weight (Kg) | 12 |
| Maximum input power (KW) | 1.7 |
| Pump rotation (rpm) | 2800 |
| Maximum pressure (bar-MPa-psi) | 130 - 13 - 1880 |
| Stop system | TS |
