

HONDA CHARGER FOR LITHIUM BATTERIES

Reference: CV3680XA EM

HONDA LITHIUM BATTERY CHARGER

The HONDA lithium battery charger with 8A power, FAST CHARGE function is compatible with the entire cordless line and also has the function of charge maintainer.

Charging times of the HONDA charger depending on the battery version:

- 35 minutes for the 4 Ah version
- 55 minutes for the 6 Ah version
- 77 minutes for the 9 Ah version

The charge maintainer function of the HONDA charger also has temperature management, thanks to the internal fan.

The goal, in the design phase, was to create a battery, for the cordless range, that was interchangeable so that only one battery could be used for the whole range of cordless products. Reduced charging times and exceptional performance on every garden product in our cordless range.

Thermo-smart technology

The lithium-ion batteries that power our cordless garden products are available in three versions: 4Ah, 6Ah and 9Ah. The thermo-smart technology used for all three allows you to continuously monitor the voltage and thermal performance of each cell to maximize battery life.

The Honda charger is suitable for the whole HONDA cordless series for your garden!
