

FIRST COLLECTION TANKS HORIZONTAL CYLINDRICAL TANKS FOR OUTDOOR USE

Reference: 5000 OR

OUTDOOR HORIZONTAL CYLINDRICAL FIRST COLLECTION TANK 5000

The POLYETHYLENE tank can be used for storing: rainwater, first flush water, fire-fighting water, domestic wastewater, landfill leachate, drinking water, etc. The tank can be drilled on the flat surfaces for the insertion of pipes or fittings. It features a vent on the cap and filling, draining, and total emptying connections. Connections to the tank must be made using flexible joints to avoid stressing the connection section. Female threaded cap to prevent material from entering the tank.

Technical characteristics:

Composition: Polyethylene
Diameter: 1700 mm
Height: 1780 mm
Width: 1700 mm
Hatch: 400 mm
