NANNI QMS21T MARINE GENERATOR 21KVA

Reference: QMS21T

NANNI QMS21T MARINE GENERATOR 21KVA

NANNI QMS21T is a three-phase marine generator equipped with a Kubota 4-stroke engine with Diesel power supply capable of delivering a maximum power of 21KVA.

The cooling system allows the NANNI QMS21T to operate at an optimal temperature. In the case of closed-circuit heat exchanger cooling, the coolant is cooled by seawater passing through the heat exchanger.

The Kubota 4-stroke diesel engine is tested in all marine or industrial applications around the world, this engine ensures excellent performance and incredible reliability. The engine consists of cast iron tunnel type block and timing gear. The Super Glow system comes as standard equipment for cold weather starting.

The E-TVCS injection system produces an ideal mixture of air and fuel by creating three swirls in the combustion chamber. The combustion efficiency of the NANNI QMS21T is improved, resulting in low fuel consumption.

NANNI QMS21T comes complete with freshwater and saltwater exchanger. Also available with a keel cooling system, also known as Keel Cooling.

The alternators used in the QMS range are manufactured by Mecc Alte, a
world leader in the production of compact synchronous alternators. All NANNI QMS generators feature an acoustic enclosure consisting of painted marine aluminum insulated panels, with multiple access doors for all necessary connections and maintenance items, including visual lifting access.
