HONDA BF 135D XRU TOTAL WHITE outboard engine 135 Hp Extra Long Shaft

Honda BF 135D XRU TOTAL WHITE outboard engines are perfect for professional use, they are reliable, compact and lightweight complete with PGM-Fi electronic fuel injection system.

HONDA BF 135D XRU are outboards optimized to offer more power for a wide range of different boats. The firm, smooth power this advanced technology offers is sure to put a smile on your face as you venture out to sea.

HONDA Outboard BF 135D XRU TOTAL WHITE is a large displacement engine that delivers superior torque and top speed and is capable of delivering power and performance for both professional and competition use.

The HONDA BF 135D XRU outboard engine is a large displacement, characterized by high torque at all operating speeds and delivers high acceleration and exceptional top speeds.

The HONDA BF 135D XRU dual-stage air induction system operates with a shuttle valve built into the Variable Air Intake (VAI) manifold. When fully open, this valve changes the resonance and airflow generating more torque at low rpm. When the throttle valve is fully open and rpm increases, the cooling valve closes and creates a direct airflow to the engine.

HONDA BF 135D XRU outboards are NMEA2000® compliant. There is no need to modify the wiring because everything is set up. Simply plug the engine into the CANbus network - the boat's nervous system - for total connectivity and control. Then the engine can be connected to other NMEA devices such as the navigation system, GPS, sonar devices, sounder and chartplotter. All information, including engine data, will be displayed via the multifunctional gauges.

The Boasting LoW Speed Torque (BLAST) system of the HONDA BF 135D XRU outboard significantly improves performance and acceleration by automatically anticipating injection times and increasing the air/fuel ratio.
