## Scangrip TRIPOD - Stationary and flexible positioning of work lights

The SCANGRIP TRIPOD is designed to meet any working situation where flexible illumination is key. Extendable from 1.35 m to 3 m, the SCANGRIP tripod offers complete flexibility to position the work light into the required height and angle.

The SCANGRIP tripod is made of durable powder coated steel and a welded steel mounting cap (10 mm thread) ensures the durability of the universal tripod stand. When not in use the SCANGRIP tripod is compact with a weight of 6 kg.
Streamlined in both design and construction, the SCANGRIP TRIPOD can be applied for both indoor and outdoor use.

To increase safety when in use, work light cables can be stored in the safety clips placed on each of the tripods legs.

Our second generation NOVAs, the new NOVA SPS, the VEGA family, STAR, MULTIMATCH 3 & 8 can be mounted directly onto the TRIPOD without the need of any additional brackets.
