FANTASTIC R32 COP16 HEAT PUMP FOR POOL 10.5KW DC INVERTER

The heat pump for swimming pools FANTASTIC R32 COP16 is equipped with a double inverter rotary compressor, capable of delivering a maximum heating power of 10.5 KW.

Once the heat pump is turned on, the inverter unit can quickly select the best operating frequencies for the compressors and fan motors, and the heat pump EEV opens automatically based on heating or cooling needs through the intelligent control technology of the inverter for the first heating, saving 50% of heating time compared to conventional heat pumps.

The FANTASTIC R32 COP16 intelligently regulates compressor speed, fan motor speed and system pressure, it can not only provide an incredible energy saving effect, but also deliver a very quiet, 12dB(A) less noise than a traditional on/off heat pump.

The heat pump is equipped with a Wi-Fi remote control with which you can control and find out how the machine is working anytime and anywhere on your smartphone, even if you are away from home.

Compared to the traditional fixed frequency heat pump, the R32 COP16 heat pump with inverter can adjust the operating power for swimming pools to avoid running at a fixed power all the time so as to have substantial energy savings.
