

ECOFLOW DELTA PRO SMART EXTRA BATTERY 3,6 KWH

Reference: 50034006

ECOFLOW DELTA PRO SMART EXTRA BATTERY 3,6 KWH

This Battery connects to an EcoFlow DELTA Pro to double the total capacity to 7200Wh, connecting the two batteries charge/discharge in unison, maintaining the battery percentage level on both units.

Charging from solar panels, power outlets, EV charging stations or from a generator set is extremely easy. Connect the supplementary battery to EcoFlow DELTA Pro and the two batteries will charge and discharge in tandem.

The supplementary battery can be integrated into the house wiring when connected to DELTA Pro. These battery units become an integral part of your home's energy-saving and emergency solutions.

All information on battery percentage, remaining charging time, hours remaining, and more is available on the built-in screen. You can check battery status anywhere from the EcoFlow app.

The extra battery benefits from all of EcoFlow DELTA Pro's charging methods, including the 6500W MultiCharge. This means that anytime, anywhere charging is possible as long as the supplementary battery is connected to EcoFlow DELTA Pro.

Charging speed varies depending on the charging method chosen. The fastest charging method is using MultiCharge to achieve a charging speed of 6500W. This allows both the EcoFlow DELTA Pro and the supplementary battery to be charged in less than 2 hours. Using a standard power outlet, a full charge can be achieved in 2.7 hours, provided the EcoFlow DELTA Pro unit is fully charged.

TECHNICAL FEATURES:

Capacity: 3600Wh
Cell Chemistry: LFP
Cycle Life: 3500
Width: 635mm
Length: 285mm
Height: 416mm
Net weight: 38 kg
