TECNOGEN PK10TC GENERATOR 10KVA SINGLE-PHASE/THREE-PHASE OPEN

The TECNOGEN PK10TC generator equipped with a PERKINS 403D-11G engine powered by Diesel and is capable of delivering a maximum power of 10KVA, complete with AVR voltage regulator.

The TECNOGEN PK10TC Equipped with **DSE6110 Control Module** that monitors speed, frequency, voltage, current, oil pressure, coolant temperature and fuel level, the modules display warnings, shutdown and fuel status. All information is clear and easy to read on the backlit LCD screen. The module offers a variety of inputs, outputs and motor protections, so the system can easily adapt to a wide range of applications.

The Generator is set to run. equipped with electric start and with low fuel consumption, in fact it consumes around 1.8 litres/hour at 75% of the load for an autonomy of up to 27 hours of operation. The generating set guarantees efficient and silent operation thanks to the PERKINS 403D-11G engine, which allows the delivery of a maximum power of 10KVA.

In addition equipped with automatic starting via the ATS panel, which allows autonomous ignition in the event of a blackout.

ATS AUTOMATIC STARTER PANEL ARRANGEMENT

The TECNOGEN PK10TC Generator is prepared for connection with automatic starter panel ATS. Thanks to which you will no longer have to worry about black-outs, since, in the event of a power failure from the mains, this panel is switched on. able to turn on the group and it will allow you; to continue your business; without losing your work data.
