AIRXCEL AQUA-HOT GEN 1 D4 E

Reference: 010 AHG1-D4E

AIRXCEL AQUA-HOT GEN 1 D4 E

The **AIRXCEL Aqua-Hot Gen 1 D4 E** is a compact forced-air heating system with **a 10-litre water heater in an all-in-one unit**, powered by the **Diesel** mode plus an optional **electric** heater, specifically designed for vehicles, vans and campers.
This product can heat water regardless of the weather outside, allowing you to stay comfortable all year round and always be ready to take a hot shower.
The electric mode gives you the opportunity to save fuel while connected to the 230 V mains.

AIRXCEL Aqua-Hot Gen 1 D4 E specifications:
Fuel type: diesel
Power supply: 12 V DC - 230 V AC
Heat output: 2000 W / 4000 W
Power in electric mode: 900 W / 1800 W
Efficiency: 91%.
Fuel consumption: 0.28 - 0.65 l/h (DIESEL)
Water tank: 10 L - Stainless steel
Current consumption (12V): 1.8 - 4.0 A
Current consumption (230V): 3.9 - 7.8 A
Dimensions (WxDxH): 510 x 450 x 300 mm
Weight: 15.6 kg
Hot air flow rate: max 287 m3/h
Water pump pressure: max 2.8 bar
System pressure: max 4.5 bar
Hot water options: 40°C - 60°C
High altitude kit: included up to 5,000m
Anti-ice valve: manual included in the kit

INSTALLATION KIT
(included in packaging)
4 Ventilation outlets
6mt ventilation hose diam. 60mm
Clamps for fixing pipe
External wall chimney complete with fixing ring nut
Steel pipe for exhaust chimney

If you are interested in the gas-powered version then you can view this product AIRXCEL AQUA-HOT GEN 1 G6 E.
