

BM2 M140 High Pressure Cleaner

Reference: 01PF46

BM2 M140 HIGH PRESSURE CLEANER

The BM2 M140 High Pressure Washer is a leading product in the high-pressure cleaning sector, designed to deliver excellent performance in a wide range of applications. With a vertical, ergonomic, and easy-to-handle structure, the BM2 M140 is ideal for both domestic and professional use, ensuring unparalleled ease of use and mobility.

The BM2 M140 is equipped with an axial pump with stainless steel pistons and an aluminum head, features that ensure long-lasting durability and optimal resistance to corrosion. This configuration maintains high performance over time, making the BM2 M140 a safe investment for those seeking reliability and efficiency.

One of the main advantages of the BM2 M140 is the total stop (TS) system upon releasing the trigger, which saves energy and extends the device's life by avoiding unnecessary water and power waste. Additionally, the thermal motor protection prevents overheating, ensuring greater safety and a longer operational life.

The quick connector for water connection simplifies hose connection and disconnection operations, making the use of the pressure washer simple and immediate. The rubber wheels ensure smooth mobility on any type of surface, while the integrated hose reel keeps the hose tidy and ready for use, avoiding clutter and accidental damage.

From a technical perspective, the BM2 M140 High Pressure Washer is a single-phase machine with a frequency of 50 Hz and a voltage of 230 V. The maximum pressure reaches 140 bar (14 MPa or 2000 psi), with a maximum flow rate of 410 liters per hour. The axial pump operates at a speed of 2800 RPM, ensuring rapid and effective cleaning.

The BM2 M140 has a maximum absorbed power of 2.0 KW and operates with a power supply of 230 V at 1 phase and 50 Hz. It can handle a maximum water supply temperature of up to 40 °C. Its compact dimensions of 320 mm in length, 280 mm in width, and 850 mm in height, and the weight of only 12 kg, make it easy to transport and store.

In terms of logistics, the BM2 M140 is designed to be efficient in distribution as well, with a capacity of 24 pieces per pallet, optimizing space during transport and storage.

In summary, the BM2 M140 Pressure Washer is a versatile, robust, and high-quality solution for all intensive cleaning needs. Thanks to its advanced features and durable construction, it represents an excellent choice for those seeking powerful and reliable cleaning.

Technical Specifications BM2 M140:

Phase type: Single-phase
Frequency: 50 Hz
Voltage: 230 V
Maximum pressure: 140 bar - 14 Mpa - 2000 psi
Maximum flow rate: 410 Lt./h
Pump: Axial
Stop system: TS
Pump speed: 2800 rpm
Maximum absorbed power: 2.0 KW
Supply voltage: 230 V - 1ph - 50Hz
Maximum inlet temp: 40 °C
Pallet quantities: 24 pcs
Length: 320 mm
Width: 280 mm
Height: 850 mm
Weight: 12 Kg.

Technical Sheet

| | |
|----------------------------------|--------------------|
| Phase | Single phase |
| Frequency (Hz) | 50 |
| Voltage (V) | 230 |
| Pump type | AXIAL |
| Maximum output capacity (Lt/min) | 410 |
| Transportability | Wheels and handles |
| Length (mm) | 320 |
| Width (mm) | 280 |
| Height (mm) | 850 |
| Feed Type | 230V - 1ph - 50Hz |
| maximum water temperature (°C) | 40 |
| Weight (Kg) | 12 |
| Maximum input power (KW) | 2.0 |
| Pump rotation (rpm) | 2800 |
| Maximum pressure (bar-MPa-psi) | 140 - 14 - 2000 |
| Stop system | TS |
