SCANGRIP Magnetic Bracket

STRONG MAGNETIC MOUNTING BRACKET FOR FLEXIBLE POSITIONING OF WORK LIGHTS

Compact and very powerful magnetic work light bracket designed for flexible mounting and positioning of work lights on any magnetic surface. Now available in a new design.

The magnet is extremely powerful with a holding force of 21.5 kg or 210 N. The magnet is rubber-coated to protect and avoid scratching the surface. For maximum flexibility, the magnet can be rotated to any desired position. Thus, even when the available magnetic surface is limited, the flexible magnetic mounting bracket can be used.

The simple, one-handed mounting bracket ensures quick and safe installation, and the work light can be tilted to any position required in daily work. An integrated stop mechanism prevents the lamp from falling out of the bracket. Press the button to release.

Technical Specifications SCANGRIP Magnetic Bracket:

Net weight (kg): 0.24
Length (mm): 120.00
Width (mm): 40.00
Height (mm): 52.00
