

SCANGRIP Stand With Wheels - for Mobile Light

Reference: 03.5682

SCANGRIP WHEEL STAND - for the Mobile Light

The SCANGRIP WHEEL STAND was developed for the mobile positioning of the work light in the detail workshop. It makes it easy to move the light where it is needed and at the

at the same time avoiding awkward and heavy lifting from one workplace to another.

The SCANGRIP WHEEL SUPPORT is extendable from 0.9 m/3 ft to 1.9 m/6.2 ft and is available in an updated design. The new base is equipped with 5 wheels for increased safety, stability and easy manoeuvrability. The wheels are robust and of high quality and glide easily even over uneven surfaces. 2 of the wheels are lockable to ensure a secure and fixed position.

It is quick and easy to position the work light on the SCANGRIP WHEEL SUPPORT and, once mounted, the light can be tilted to provide the optimum beam angle. Once the job is done, it can be easily set aside.

As an additional feature of the new and updated WHEEL STAND, it now comes with a flexible bracket that allows a second work light to be easily positioned to illuminate it from below. The additional mounting bracket is height adjustable and offers complete flexibility to position the light at the optimal height. When working on the side of the car or carrying out preparation work on the panel, this dual light option provides perfect, shadow-free illumination from both the top and bottom sides.

The SCANGRIP WHEEL SUPPORT is made of durable and robust powder-coated steel for both indoor and outdoor use.

please note that this additional MOUNTING BRACKET is required as an accessory to attach UV-EXTREME or UV-EXTREME PLUS to the underside of the WHEEL BLOCK
