

FENZI G12 GO AdBlue Transport Container 440LT

Reference: G12 5020

FENZI G12 GO ADBLUE TRANSPORT CONTAINER 440LT

The FENZI G12 GO Transport Container for AdBlue in 440LT polyethylene is the ideal solution for the safe and efficient transport of AdBlue. The FENZI Container has been carefully designed to offer the best ratio between external dimensions and useful capacity, distinguishing itself as one of the most compact on the market. The FENZI G12 GO Container model is made of linear polyethylene through rotational molding, ensuring lightness, sturdiness, and safety.

Main Features of FENZI G12 GO:

The FENZI G12 GO Transport Container is exempt from ADR regulations, allowing it to be transported on all common transport vehicles without restrictions. This portable tank includes a series of features that make it unique:

- Reinforced lockable lid: Ensures optimal security during transport.
- Filling cap with vent: For easy and safe refilling.
- Double-acting safety valve: To prevent leaks and provide additional safety.
- AdBlue transfer unit: Facilitates the transfer of the liquid.
- Lift entries for full load with forks: Allow safe and stable lifting.
- Handles for lifting when empty: For easy handling when the container is empty.
- Strap positioning housings: Ensure the container remains well-anchored during transport.
- INOX level indicator: Provides an accurate reading of the content.
- Aluminum or AdBlue-compatible material inserts: For long-lasting durability and corrosion resistance.

Technical Specifications of FENZI G12 GO:

The FENZI G12 GO Container has a capacity of 440 liters, with dimensions of 800L x 1200W x 700H mm and a thickness of 9 mm. The empty weight with the pump unit is 55 kg. It is equipped with a 12 or 24-volt pump that delivers 40 liters per minute, a 4-meter flexible hose with an automatic nozzle, and 2-meter battery connection clamps. The lockable lid is included, as well as the housings for anchoring straps and openings for full-load lifting with forks.

Optional Accessories for FENZI G12 GO:

For further customization, an in-line digital flow meter is available, providing precise measurement of the dispensed liquid.

The FENZI G12 GO Polyethylene Container represents the ideal solution for those who need a portable tank that combines compactness, safety, and practicality. Its sturdy and lightweight structure, combined with numerous safety features, makes it perfect for the efficient and safe transport of AdBlue.

By choosing the FENZI G12 GO Container, you opt for a high-quality product designed to meet the most demanding market needs. Reliable, safe, and easy to use, the FENZI G12 GO Container is a safe investment for the transport of AdBlue. Not only does it meet all safety regulations, but it also offers a range of features that facilitate the transport and handling of the liquid, always ensuring optimal performance.
