FENZI G7 ALU ALUMINIUM TANK

The FENZI G7 ALU Aluminum Tank is the ideal solution for those who need an efficient and safe system for diesel transport. The FENZI G7 ALU is designed with aluminum alloys, offering an optimal combination of strength and lightness. Thanks to its aluminum construction, the tank is highly resistant to weathering and completely recyclable, making it a sustainable and durable choice over time.

Main features of the FENZI G7 ALU Tank:

- Material and Construction: The tank is entirely made of aluminum, which ensures remarkable structural strength and lightness. This allows for easy road transport, including on pickup truck beds, without the need to remove the fastening straps.
- Capacity and Dimensions: With a capacity of 430 liters and dimensions of 1000L x 750W x 870H mm, the FENZI G7 is both compact and spacious. The empty weight with the pump unit is only 50 kg, making handling and installation easier.
- Safety and Convenience: The tank is equipped with a lockable lid to prevent unauthorized access and a vented filler cap to avoid spills and ensure safe and clean operation.

Features of the dispensing system:

The FENZI G7 ALU Aluminum Tank includes a sophisticated dispensing unit, consisting of:

- 12V electric pump with a flow rate of 40 liters per minute, ensuring quick refueling.
- Automatic nozzle connected to a 4-meter rubber delivery hose, facilitating access and use in various situations.
- 2-meter battery connection clamps, ensuring easy connection to the vehicle's power supply.

Additional features:

The FENZI G7 ALU Aluminum Tank is designed for versatile and safe use, including:

- Housing for the positioning of anchoring straps and lifting points for full load handling with forks, ensuring stability during transport.
- Internal baffle, which minimizes liquid movement during transport, increasing safety.
- Sealed pump housing, to prevent accidental spills and keep the work environment clean.

Optional accessories:

To meet additional specific needs, the FENZI G7 ALU Aluminum Tank can be equipped with a range of additional accessories, including:

Digital flow meter, for precise monitoring of dispensed fuel.

Level indicator, to keep track of the amount of diesel in the tank.

Diesel impurity filter and water absorption filter, to keep the fuel clean and free of contaminants.

Technical specifications of the FENZI G7 ALU:

Capacity: 430 liters

Dimensions: 1000L x 750W x 870H mm

Empty weight with pump unit: 50 kg

12-volt pump with a flow rate of 40 l/min (options for different flow rates and voltages available)

4-meter flexible hose with an automatic nozzle

2-meter battery connection clamps

Lockable lid

The FENZI G7 ALU Aluminum Tank represents an advanced and reliable solution for the safe and practical transport of diesel, combining innovation, strength, and sustainability.
