SCANGRIP AREA 10 CONNECT 10,000 Lumen - 18V/20V Battery

SCANGRIP AREA 10 CONNECT: High-efficiency LED work light with 360° illumination

The SCANGRIP AREA 10 CONNECT work light is a powerful and versatile lighting solution, ideal for professionals who need intense and uniform light for the entire work area. With a maximum output of 10,000 lumens, this LED floodlight guarantees optimal illumination in any situation, both indoors and outdoors.

Main features:

Powerful and uniform illumination: AREA 10 CONNECT offers an adjustable luminous flux from 1,000 to 10,000 lumens, with a color temperature of 6,000 K (cool white light) and a CRI greater than 80 for accurate color rendering.

Wide coverage: The 360° main beam angle ensures complete coverage of the work area, eliminating shadows and ensuring optimal visibility. You can also select the 180° lighting mode to concentrate the light in a specific direction.

Versatile adjustment: The integrated dimmer function allows you to adjust the light intensity to five different levels, adapting the lighting to the specific needs of the moment.

Compatibility with multiple batteries: AREA 10 CONNECT is compatible with CAS 18V (Metabo) batteries and with other 18V/20V battery packs from leading power tool brands via SCANGRIP CONNECTOR. This feature offers great flexibility and allows you to use the batteries you already own.

Hybrid power supply: In addition to battery compatibility, the floodlight can be powered directly via SCANGRIP POWER SUPPLY, ensuring continuous lighting without interruptions.

Integrated backup battery: AREA 10 CONNECT is equipped with an internal backup battery that guarantees 50 minutes of autonomy at 1,000 lumens, offering extra security in case of interruption of the main power supply.

Compact and durable design: The compact design with carrying handle makes the floodlight easy to transport and position. The robust structure with IP65 protection rating (IP54 with battery cover) and 1 meter impact resistance ensures long life even in difficult working conditions.

High energy efficiency: AREA 10 CONNECT offers high LED performance (189 lm/w) and a power consumption of 84 W, ensuring powerful lighting with a low impact on consumption.

Technical Features SCANGRIP AREA 10 CONNECT:

Product type: LED Floodlight
Light source: High-efficiency COB LED
Luminous flux, Max (Lumen): 10,000
Luminous flux, Min (Lumen): 1,000
Illuminance, Max (Lux@0.5m): 3,000
Illuminance, Min (Lux@0.5m): 300
Illumination distance (meter): 0.50
CRI: Ra > 80
CCT temperature (Kelvin): 6000
Adjustable light output: 5 levels
Main beam angle: 360°
LED performance (lm/w): 189
Compatibility (CAS): CAS 18V batteries, CONNECT THE POWER
Power consumption (W): 84.00
Ingress protection: IP65 (IP54 with battery cover)
Impact resistance (meter): 1.00
Backup battery operating time (h): 50 min at 10% (1000 lm)
Operating time with max. lumens (battery/hours): 1h with 18V 5.2 Ah battery
Operating time with min. lumens (CAS/hours): 22h with 18V 5.2 Ah battery
Impact protection: IK07

In the appropriate section [dedicated to lamps and lightglobes](#) you can find all the best professional mobile lighting systems on the market at advantageous prices.

Technical Sheet

Protection degree	IP65
Adjustment positions	5
Type of lamps	LED
Total lumens (Lm)	10000
Length (mm)	395
Width (mm)	200
Height (mm)	212
Product type	Projector
Weight (Kg)	3.70
Video	cF7CjfjGSyA
Operating temperature	-10° to +40°C
