Gys EV Charging Cable T2 Single-Phase 7.36KW

Gys EV Charging Cable T2 Single-Phase 7.36KW is an efficient and safe charging solution for electric vehicles, designed for everyday use in domestic environments or public charging points with a single-phase power supply.

Main Features:

Powerful Single-Phase Charging:

With a maximum current of 32 A, this cable provides a charging power of 7.36 kW, allowing you to charge the vehicle in reasonable time. Ideal for overnight charging or during extended stops.

T2 Connector:

Equipped with a type 2 connector, the European standard for electric vehicle charging, ensuring compatibility with most electric and hybrid vehicles.

Technical Features:

Phase Type: Single-Phase

Current (A): 32 A

Maximum Single-Phase Power (KW): 7.36

IP Protection: IP66

Charging Cable: 5 m
