

DIN rail Power Manager for single-phase systems

Reference: PM02M

DIN rail Power Manager for single-phase systems Power Meter

Power Meter is a clever sensor that effectively monitors energy flows at the meter. It is essential for intelligently adjusting the charging of one or more chargers based on other network loads and optimizing the use of available photovoltaic production.

Technical Sheet

| | |
|---------------------------------|----|
| Maximum power single phase (KW) | 10 |
| Current max (A) | 64 |
