

HAZT GD 3000 Silent - High-Performance Silenced Generator

Reference: GD3000

HAZT GD 3000 Silent - High-Performance Silenced Generator

The HAZT GD 3000 Silent generator set is the ultimate solution for those seeking reliable power without the hassle of excessive noise. Designed for consistent performance, it ensures flawless energy management in every critical situation.

- Maximum operating silence for sensitive environments.
- Compact design ideal for transport and storage.
- Stable power output to protect your devices.
- Rugged construction built to last.
- Quick and intuitive start-up for immediate use.

Product Overview

The HAZT **GD 3000 Silent** represents technological excellence in portable power generation systems. Thanks to its advanced insulation, it dramatically reduces noise emissions, making it perfect for home use, camping, or professional settings where discretion is essential.

Technical Details

This generator features an efficient cooling system and high-quality components that ensure a long operating life. Integrated technology allows for optimized fuel consumption, balancing raw power and operational sustainability without compromise.

- Emergency power for private homes during power outages.
- Energy support for outdoor events and recreational activities.
- Use on small construction sites requiring low noise emissions.

Frequently Asked Questions

How quiet is the HAZT GD 3000 Silent? It is designed with sound-absorbing panels to operate at lower decibel levels than standard models. **Is it easy to transport?** Yes, the design is optimized for mobility and stability on various surfaces.

Technical Sheet

Fuel	Diesel
Frequency (Hz)	50
Engine	Hatz 1B30VE
Engine rpm (rpm)	1800/3100
Starting system	Electric
Power (kW)	3.5
Protection degree	IP23
Current max (A)	13A
Voltaggio	230 VAC
OUTPUT	AC, MONOFASE, cos. phi 1,0
