Dometic FreshJet FJZ4 1700 - Compact Camper Air Conditioner

Refined Comfort on the Go

The Dometic FreshJet FJZ4 1700 ceiling unit transforms every journey into a truly relaxing experience, providing powerful yet quiet air conditioning for your recreational vehicle.

- **Energy Efficiency:** Advanced technology for rapid cooling with minimal energy consumption when camping.
- **Extremely Quiet:** Designed to operate discreetly, ideal for quiet rest.
- **Ultra-Compact Design:** Saves valuable roof space for solar panels or satellite dishes.
- **Control Intuitive:** Simple and precise temperature control for a personalized climate every time.
- **Adjustable Air Flow:** Optimized air distribution eliminates hot spots inside the cabin.

Dometic Performance and Technology

The **Dometic FreshJet FJZ4 1700** strikes the perfect balance between compact size and cooling capacity. Thanks to its optimized design, it is ideal for medium-sized campers and caravans, offering **1700 watts of cooling power**. Easy installation and the typical Dometic durability ensure a long lifespan, withstanding the stresses of road trips. **Integrated filtration system** purifies the air during operation.

Usage Scenarios

- Perfect for cooling the passenger compartment during summer breaks in hot Mediterranean resorts.
- Ideal for couples looking for a comfortable climate without taking up too much space.
- An excellent solution for dehumidifying the interior environment on gloomy days.

FAQ

- **Is it suitable for what size vehicles?** Recommended for vehicles up to 6 meters in length.
- **Does it require a lot of maintenance?** Maintenance is minimal, limited to periodic filter cleaning air.
- **Can it be controlled via app?** Check compatibility with dedicated Dometic smart control systems.
