

FRIMED Medical Refrigerator RB15V 150LT

Reference: RB15V

FRIMED RB15V 150LT Medical Refrigerator

The RB15V from the FRIMED smartLINE line is a professional refrigerator designed for use in laboratories and pharmacies, where reliability, temperature stability, and constant conservation control are required. With a capacity of 150 liters, it represents a compact yet more capacious solution, suitable for those who need extra space without sacrificing precision and efficiency.

Technical characteristics:

Capacity: 150 liters.

Temperature range: 2°C to 12°C.

Cooling type: static ventilated evaporator.

Defrost: automatic.

Refrigerant gas: R290

Noise level: 45 dBA.

Power supply: 230 V, 50/60 Hz.

Power cord: removable with Schuko plug.

Control: electronic microprocessor with digital adjustment in increments of 0.1°C.

Dimensions: 600x600x1290 mm

Technical Sheet

Frequency (Hz)	50 / 60
Product dimensions (mm)	600x600x1290
Acoustic pressure	45 dBA
Feed Type	230 V
Coolant	R290
Total capacity liters	126
Temperature [°C]	-2% / +12%

Cooling system

Ventilated static evaporator.
