

GH POWER GHG6000E Portable Gasoline Generator 5.5kW

Reference: GHG6000E

GH POWER GHG6000E 5.5kW Portable Gasoline Generator

The GH POWER GHG6000E 5.5kW generator provides power for work even when off-grid. Wheels and handles make it easy to move between different work areas.

The GHG6000E is a gasoline-powered generator designed to produce electricity where a fixed connection is unavailable. It delivers an output voltage of 230 V, suitable for powering equipment compatible with the generator's electrical specifications. It offers a maximum power output of 5.5 kW, and the electric start makes on-site operation convenient.

Technical Specifications:

Model: GHG6000E

Type: Gasoline generator

Maximum power (ESP): 5.5 kW

Rated power (PRP): 5.0 kW

Voltage: 230 V

Frequency: 50 Hz

Cooling: Air-cooled

Starting system: Electric ■ ■ ■ ■

Dimensions: 700 × 560 × 562 mm

Weight: 79 kg

Tank capacity: 30 liters

Displacement: 420 cc

Noise level: 97 dBA @ 7m

Sockets: 2x16A

Runtime at 100% load (h): 8

Technical Sheet

Engine	PT190F
Fuel	Gasoline
Frequency (Hz)	50
Voltage (V)	230
Starting system	Electric
Cooling	Air
Product dimensions (mm)	790 x 650 x 745
Acoustic power	97 dB(A)
Weight (Kg)	35
Maximum power (KW)	5.5
displacement	420
