Reference: JD35T

### TECNOGEN JD35TK OPEN GENERATOR 32kVA

The TENAX series includes diesel generators, 1500 rpm, water or air cooled, with power outputs ranging from 5.5 to 2255 kVA max, delivering three-phase voltage 400/230 V. Available both in open skid version and super silent version, they are equipped with industrial engines Perkins, John Deere,

Iveco Aifo or Lombardini and alternators from leading global brands such as Leroy Somer, Stamford, Mecc Alte or Marelli.

The canopies, designed to ensure excellent soundproofing levels and optimal engine cooling, are entirely built in hot-dip galvanized steel and subsequently painted with polyester powders, making them practically resistant to atmospheric agents. Thanks to their features, these machines are particularly suitable for continuous use in industrial applications and, in the super silent versions, for applications with automatic transfer switch in the civil sector. They are also available, on request, with different engine options, including Cummins, Volvo, Deutz and Mitsubishi.
