HONDA HHH 25D 60 Hedge trimmer

HONDA HHH 25D 60 hedge trimmer with adjustable handlebar and 60 cm blade. The portable hedge trimmer HONDA HHH 25D 60 has the advantage of being able to count on the unbeatable Honda GX25 engine, capable of making the many gardening jobs within reach of these tools easy. As soon as you put the HONDA HHH 25D 60 Hedge Trimmer into operation, you'll understand why it's so quiet. Pick one up and you'll feel the difference. They are ergonomic, low-vibration, ideal companions for taking care of all types of hedges. It doesn't matter whether it's lush or uncultivated, the HONDA HHH 25D 60 portable hedge trimmer can quickly bring an uneven hedge back into perfect shape.

Centrifugal clutch

When the speed reaches a certain threshold, the outward centrifugal force produced by the motor drive shaft determines its engagement with the external output shaft ensuring a gradual transfer of power to the cutting blades. When the revolutions decrease, the springs retract and disengage smoothly and evenly.

Remain at apex

The HONDA HHH 25D 60 hedge trimmer not only keeps the hedge in great shape, but thanks to the self-sharpening blades, the teeth also remain in excellent condition. And, thanks to the standard blade protection, they are guaranteed to last a long time.

Easy starting

The Honda engine has a mechanical decompression system that ensures a smoother starting stroke. Combined with a super lightweight flywheel, the starter rope's pull weight is only 7.2 kg.

Easy handling

The handlebars and controls have been perfectly positioned for maximum comfort. You can work much longer than you think and both HRH 25D models allow a 180° adjustment of the handlebar for even greater flexibility.
