TELECO TELAIR TeleplusX2-165VU Digital and Analogue Terrestrial Antenna

Reference: 20615

TELECO TELAIR TeleplusX2-165VU Terrestrial Digital and Analog Antenna

The TELECO TELAIR TeleplusX2-165VU represents the evolution of the iconic Teleplus antenna, designed to ensure maximum performance in receiving terrestrial TV signals, both digital and analog. With an optimized design and state-of-the-art technological innovations, this TELECO TELAIR antenna is ideal for those seeking reliability, power, and flexibility in any condition.

Main features of the TELECO TELAIR TeleplusX2-165VU:

High sensitivity: Thanks to the optimization of the gain curve, the TELECO TELAIR TeleplusX2 can capture even the weakest signals, providing superior reception quality.

Dual polarity: Equipped with an advanced zamak mechanism, it allows easy adjustment of polarity (horizontal or vertical) from inside the vehicle, ensuring optimal reception in any situation. This is particularly useful in countries where vertical polarity signals, such as in Italy and England, are predominant.

Integrated amplifier: Includes a low-noise amplifier with adjustable gain up to 38 dB (UHF) and 22 dB (VHF), compatible with 12 or 24 Vdc power supplies.

LTE/5G filter: Designed to eliminate potential interference caused by LTE signals in the 700-800 MHz band, ensuring stable and disturbance-free viewing.

Versatile mounting: Thanks to the wedge spacer, the TELECO TELAIR TeleplusX2-165VU perfectly adapts to any roof configuration, ensuring secure and precise installation.

Technical specifications of the TELECO TELAIR TeleplusX2-165VU Terrestrial Antenna:

Supported bands: VHF (channels E5-E12) and UHF (channels 21-48).

Gain: Up to 38 dB (UHF) and 22 dB (VHF) with amplifier.

Power supply: Compatible with 12Vdc and 24Vdc systems.

Dimensions: Version with a 165 cm long pole, ideal for maximizing coverage.

If you are looking for a reliable and high-performance solution for TV reception during your travels, the TELECO TELAIR TeleplusX2-165VU is the ideal choice. Designed to resist interference and optimized for modern broadcasts, this antenna stands out for its efficiency and practicality.
