TELECO TELAIR Teleplus Directional Antenna

The TELECO TELAIR Teleplus Directional Antenna, a result of TELECO and TELAIR's quality and innovation, is a directional antenna designed to deliver excellent performance in receiving DVB-T2 digital terrestrial signals. Ideal for home environments, campers, and caravans, this antenna combines advanced technology and durable materials to ensure a flawless viewing experience.

Main features of the TELECO TELAIR Teleplus:

Maximum reception efficiency: Thanks to its adjustable gain of up to 36 dB, the TELECO Teleplus is perfect for capturing even weak or disrupted signals.

Integrated LTE filter: This directional antenna features an LTE suppression filter, eliminating interference caused by modern 4G/5G smartphones, especially in the 700-800 MHz bands (applicable in countries with active LTE transmissions).

Power versatility: The TELECO Teleplus operates on 12/24 Volts, making it ideal for mobile use in campers and caravans.

Compact and lightweight: Measuring 50.5 cm in length and weighing only 1.8 kg, this antenna is easy to install and transport.

TELECO TELAIR Teleplus Technical Specifications:

Supported channels: 5-12 and 21-48.

Adjustable amplifier gain:

22 dB for VHF channels.

36 dB for UHF channels.

Dimensions:

Length: 50.5 cm.

Width: from 40 to 70 cm (expandable).

Mounting compatibility: Pole diameter from 25 to 50 mm.

TELECO TELAIR Teleplus Package Contents:

Directional TV antenna with a mounting bracket compatible with poles of various diameters.

Adjustable amplifier equipped with:

3 TV outputs.

1 DAB/FM Radio output.

5-meter coaxial cable with 3 F connectors (75 Ohms).

The combination of high directionality and adjustable gain enables the TELECO Teleplus to effectively suppress disruptive signals, ensuring excellent reception quality even in areas with strong interference. Additionally, the collaboration with TELAIR ensures maximum reliability and product durability.

Applications of the TELECO TELAIR Teleplus:

This directional antenna is ideal for:

Campers and caravans, thanks to its compatibility with 12/24 Volt electrical systems.

Homes in areas with weak signals or LTE interference.

Travel and outdoor enthusiasts, due to its portability and easy installation.

Choose the TELECO Teleplus, a directional antenna that combines innovation, quality, and superior performance to deliver a stable and crystal-clear signal wherever you are. TELECO and TELAIR technology is the ideal choice for those seeking the best in DVB-T2 digital terrestrial signal reception.
