

# DOMETIC COOLMATIC CRX 65S Compressor refrigerator 12/24 Volt DC

**Product price:**

**950,00 € tax excluded**

## **Product description:**

The CRX Series of refrigerator is a veritable chameleon. It's a fridge, it's a fridge-freezer and it's a freezer. This patented invention is down to the removable freezer compartment and smart electronics that regulate the compressor speed, simultaneously saving energy. The freezer box can simply be pulled out to make a larger fridge or freezer and the desired temperature manually set. (CRX 110 and 140 does not include removable freezer compartment).

This smart compressor refrigerator offers 57 l of cool storage and an optional 7 l of freezer space. Smart electronics mean it's superbly efficient and generates minimal noise.

## **Removable freezer**

The freezer compartment can easily be removed to make room for more fridge storage

## **Two-in-one**

The fridge's control panel also has an integrated light.

## **Convenient solutions**

Flexible shelves, bottle holder, egg compartment, and separate baskets.

## **Organised storage**

The fridge interior contains well organised shelves.

## **Separate storage**

The separate compartment is ideal for storing fresh fruit and vegetables.

### Cooler than ever

The compressor refrigerators in the CoolMatic CRX series are ingenious quick change artists. Their trick is no secret, but a patented Dometic invention. The freezer compartment can simply be pulled out to make room for a larger fridge or freezer. The desired temperature is set on the soft touch control panel which is mounted flush in the inner wall and elegantly integrates the LED light. There's smart electronics behind it: the system regulates the compressor speed therefore achieving energy savings of up to 25%. Small or medium-sized motorhome or boat, single person or big family – nobody has to go without a Dometic CoolMatic refrigerator.

### Where does the CRX get its immense power?

Compressor cooling technology, used in Dometic's CRX series, offers unrivalled cooling power. But how does it work? Well, it relies on a refrigerant that changes from a liquid to gaseous state in the evaporator. The evaporation process extracts heat from the interior of the cooling unit, causing the temperature to drop. The compressor draws in the refrigerant, compresses it and passes it on to the condenser. From here, the absorbed heat is released into the atmosphere. The refrigerant liquefies and flows back to the evaporator, where the cycle begins again. The result of this is an excellent cooling performance, capable of deep-freezing, even at extreme ambient temperatures.

### The 3-in-1 cooling solution

The Dometic CoolMatic CRX 65 S offers 57 l of cool storage and an optional 7.5 l of freezer space. Providing a 3-in-1 solution, you can choose between having: a fridge, freezer or both at the same time! By automatically adjusting its fan speed to the ambient temperature the CRX 65 S also generates minimal noise. It boasts an intelligent electronic control of the compressor speed making it up to 25 % more efficient. With temperature control via the soft touch control panel and a bevelled back edge for a close fit – this is one seriously efficient, intelligent fridge.
