

TRUMA COMBI 6 Gas Stove 6 KW for Camper and Truck

Product price:

1.810,00 € tax excluded

Product description:

TRUMA COMBI6 Heater and hot water heater for large vehicles

The Truma Combi6 is a heater that also works with an empty water tank.

Thanks to the asymmetrical shape of the Truma Combi6 stove the stainless steel tank heats the water more quickly and evenly

Four outlets for optimal hot air distribution

Lightweight and compact design of the Combi6 allows for flexible installation

Low power consumption

Truma Combi6 heater works great for heating large vehicles.

The Truma Combi6 stove has a nominal output of 6 kW. It can heat a medium-sized motorhome or caravan efficiently and comfortably.

The Truma Combi6 heater is also equipped with an integrated 10 litre boiler, which allows it to produce domestic hot water.

Technical specifications TRUMA Combi6 Stove

Propane / butane

Operating pressure 30 mbar

Nominal heat output gas operation 2000 W / 4000 W / 6000 W

Fuel consumption 160 - 460 g/h

Current consumption (at 12 V): short-term heating and water tank operation max. 6.5 A (average approx. 1.4 A)

Current consumption (at 12 V): water tank heating max. 0.4 A

Air flow rate (free discharge) with 4 hot air outlets max. 287 m³/h

Quiescent current approx. 1 mA

Quiescent current CP plus (optional) 3 mA

Electrical heating element for FrostControl (optional) max. 0.4 A

Capacity 10 litres

Pump pressure max. 2.8 bar

System pressure max. 4.5 bar

Heating time (from approx. 15 °C to approx. 60 °C): Water tank approx. 23 min.

Heating time (from approx. 15 °C to approx. 60 °C): Heating and water tank according to EN 15033 approx. 80 min.

Weight approx. 14.4 kg

Dimensions (W x D x H) 510 x 450 x 300 mm

Overall dimensions (minimum dimensions: depending on installation situation, additional space required for gas and water connection and drain valve) (W x D x H) 540 x 500 x 350 mm

More details on the Truma Combi6 Stove

The Truma Combi6 Stufa performs two functions in one appliance: heating and hot water. The particularly light and compact Truma Combi6 Stufa ensures pleasant temperatures in large motor homes and caravans. It contains a 10-litre stainless steel water tank, which is also heated in winter. In summer, you can also heat only the water. It only takes about 20 minutes to bring the water up to 60°, which is ideal for a shower after a strenuous mountain bike tour.

The Truma Combi6 Stove can be installed in different vehicles with great flexibility. Four outlets silently spread the warm air evenly inside the vehicle, creating a perfect room climate. As the Truma Combi6 Stufa can be positioned, for example, under the chest, the passage to the interior is not obstructed.

The Truma combi6 exhaust valve FrostControl is already fitted

Easy to operate thanks to the CP plus iNet ready digital control unit

Automatic air conditioning available in combination with a Truma heater air conditioner.

Product features:

Phase: Single phase

Fuel: Gas

Tank capacity (L): 10

Max rated heat power: 6000 W

Min rated heat power: 2000 W

Max Gas consumption (Kg/h): 0.46

Min Gas consumption (Kg/h): 0.16

Gas pressure (bar):

Air flow (m³/h): 287

Length (mm): 510

Width (mm): 450

Height (mm): 300

Type of climate control: Stove for Campers

Weight (Kg): 14.4
