

ZIPWAKE KIT BOX 750S

Product description:

ZIPWAKE KIT BOX 750S DYNAMIC ASSET CONTROL SYSTEM FOR BOATS

ZIPWAKE box 750s is an all inclusive KIT for dynamic control for the trim of boats containing:

- 1 Control Panel complete with 7 mt of standard cable
- 1 Distribution Unit with 4 mt of power cable
- 2 Interceptors 750s with 3 mt of cable and cable cover
- 1 extension cable of 1. 5 mt

The basic installation can be expanded with up to two extra pairs of S series interceptors, for a total of six interceptors without the need to purchase additional connectors or power supplies; just those contained in the kit ZIPWAKE box 750s.

COMFORT AND SAFETY ZIPWAKE box 750s

compensates for pitch and roll from vessels dynamically and in real time, increasing navigational comfort and safety on board.

EXCELLENT PERFORMANCE AND REDUCED FUEL CONSUMPTION

It minimizes wave resistance automatically; the roll and resistance offered by waves are the main cause of strain on boat engines.

Thanks to ZIPWAKE box 750s your boat's fuel consumption will drop considerably.

INTUITIVE AND PRECISE

Revolutionary 3D controls offer unprecedented control of trim and direction of travel, to dominate the waves.

ZIPWAKE box 750s: DURABLE AND EFFECTIVE

The patented series of fast-acting, durable interceptors provide exceptional performance and

great durability.

COMPLE AND COMPETITIVE

The all-inclusive modular design offers simple installation and ease of expansion without sacrificing quality, making the system affordable and usable by even the least experienced.

Interceptors from Swedish manufacturer Zipwake are dynamic trim correctors that smooth out boat roll, correct pitch and navigational trim, and consume less fuel. Zipwake's new 2020 Interceptor range is ideal for boats from 20 to 60 feet (6 to 18 meters), is electrically powered and is easy to install even on newer boats.

ZIPWAKE Interceptors are available in four lengths (350 mm, 400 mm, 450 mm and 600 mm) and can be combined according to the size and shape of the keel: a maximum of 6 can be installed per boat, connecting them to the same electronic control unit which is in turn controlled by a digital control panel with an integrated gyroscope that automatically sends the impulse to the Interceptors to correct the trim. The response is extremely fast.

The system can be configured to support 1, 2 or 3 control stations.

Product features:

Voltage (V): 12 - 32

Power cable length (m): 4 +7 + 3

Length (mm): 155

Width (mm): 980

Height (mm): 275

Product type: Dynamic Trim Control System

Weight (Kg): 11.7
