

DOL PRO BATTERY CHARGER 3 OUT 24V 150A 230/400V

Product description:

PRO TOUCH Series

DOL PRO BATTERY CHARGER 3 OUT 24V 150A 230/400V

AC/DC battery chargers from 40A to 150A. The powerful solution for yachts and super-yachts(offshore yachting), for commercial and military vessels, offshore platforms and other industrial applications. More than 25 000 units sold worldwide.

Super User-Friendly

Since 2019, all PRO units include TOUCHVIEW, the best HMI on the market, as standard equipment. For a perfect battery monitoring experience

SuperConnected

All PRO TOUCH Chargers are smart, “open” devices with standard CANbus J1939 interface. They are also NMEA-Ready (NMEA2000 option is available from one unit). All PRO TOUCH Chargers can therefore be connected to any modern onboard system

Safe&Transparent

All PRO TOUCH Chargers feature an integrated Control Panel which displays the charging curve and will warn you of any alarms (temperature, voltage, fuses issues)

Ultra-Efficient

PRO TOUCH chargers deliver full power even at very high temperatures (up to 50°C/122°F). This “no derating” feature is quite unique on the market. These models are configured with automatic (115V/230V and 50Hz/60Hz) switchover, except for three versions (24V/80A,

24V/100A and 48V/50A) which exclusively feature 230V

Robust+

With their marinized circuit boards, our PRO TOUCH Chargers are specifically designed for sustained commercial use and tough environment. They come in a solid, 100% high-grade aluminum casing.

Product features:

Phase: Single phase / Three phase

Voltage (V): 230 / 400

Current (A): 150

Charging voltage (V): 24

Length (mm): 243

Width (mm): 356

Height (mm): 407
