Product description:

GENMAC MAGNUM G500VS-E3

The GENMAC MAGNUM G500VS-E3 is a 500 KVA super-silenced single-phase/three-phase diesel generator with Stamford alternator and AVR voltage regulator.

Thanks to its diesel fuel supply, the GENMAC MAGNUM G500VS-E3 can only consume 10.52 m³/h at full load and has a low environmental impact, making it one of the best in its class.

The long life and reliability of the GENMAC MAGNUM G500VS-E3 is due to a special control procedure during the various stages of production.

The GENMAC MAGNUM G500VS-E3 is suitable for applications in different contexts such as: hospitals, industries, shopping malls, hotels, airports, banks, universities, stadiums, offices, etc.

The Stage 3A engine allows the use of the generator set also for mobile use, for example for roadworks and rental services.
