## Product description:

### LARIUS MIRO K21561 AIRLESS ELECTROPOMPAINTING PUMP

LARIUS MIRÒ K21561 is an airless electric paint pump for use in high pressure without the aid of air (hence the term AIRLESS), capable of delivering a maximum flow rate of 2.2 l/m.

LARIUS MIRÒ K21561 is a high-pressure electric pump equipped with the exclusive electric piloting system that allows the safeguard of the motor and of the board, in case of lack of grounding, sudden changes of tension, overheating and inadequate electric extensions.

LARIUS MIRÒ K21561 is able to apply in total efficiency in the aspiration and application of dense and viscous products, in addition thanks to the airless technology the drying times are greatly reduced, this allows the lesser contribution of diluting liquids to the product.

Thanks to LARIUS MIRÒ K21561, the coating process will be faster and less costly; in fact, it makes it possible to cover the entire application zone in fewer passes.

All the components that characterize the LARIUS MIRÒ K21561 pump are of high quality and allow a very high resistance to wear and tear.
