Product description:

HONDA HRX 537C6 VY EA LAWNMOWER 3,2KW SEMOVENT WITH VARIABLE MUNCHING

The HRX 537C6 VY EA lawnmower is equipped with a gasoline-powered GCV190 engine capable of delivering a power of 3,2KW, suitable for large lawns (over 500 square meters).

The HONDA HRX 537C6 VY EA lawnmower have high performance, low noise levels and feature a number of Honda-exclusive technologies, such as: Select Drive for precise control, Versamow for selective mulching and Roto-Stop to safely disengage the cutting blades.

The Lawn Mower's GCV190 4-stroke engine has an enhanced combustion process that not only improves fuel efficiency, but ensures easy starting, even after winter idle time.

The Versamow featured as standard on the Mower, features seven settings, from collection to full mulching, allowing precise control over the amount of grass clippings you deem most suitable for fertilizing your lawn.

The HONDA HRX 537C6 VY EA lawn mower comes complete with the Roto-Stop safety system that allows you to stop the blades quickly and safely, without having to turn off the engine.

Roto-Stop of the HONDA HRX 537C6 VY EA allows you to stop the blades but leave the motor running while emptying the grass bag or moving along driveways. The blades are designed to bend, not break, if they hit solid obstacles while cutting. In addition to improving safety, this innovation prevents further damage.
