

Rental HONDA EU 70is Petrol Inverter Generator 7 kW 8.75 kVA

Product description:

GENERATOR RENTAL 7 KW HONDA EU70IS super-silenced inverter

GENERATOR RENTAL 7 KW HONDA EU70is, portable gasoline power generator of 7 KW single phase, super-silenced and with inverter technology voltage regulator.

The starting system of the Rental Honda Eu70is generator for hire is of the electric key type with 12 V battery and alternatively also with manual recoil starter.

As a home or office generator set, the GENERATOR RENTAL 7 KW Eu70is rental generator is perfect for both hobby and professional use, thanks to its reliable gasoline-powered Honda engine and all the top-quality components of which it is composed.

The GENERATOR RENTAL 7 KW HONDA EU70is rental generator is small but contains all the features and innovations necessary to ensure the delivery of clean, environmentally friendly energy for the operation of sensitive electronic equipment in large outdoor environments.

Technical specifications GENERATOR RENTAL 7 KW HONDA EU70IS:

Type of Phase: Single Phase

Maximum power Single Phase (kW): 7

Continuous use Single Phase (kW): 5.5

Maximum power Single Phase (kVA): 8.75

Continuous use Single Phase (kVA): 6. 87

Fuel: Gasoline

Voltage (V): 230

Frequency (Hz): 50 Hz

Engine: Honda GX390

Type: 4-stroke, OHV, 1 cylinder

Start: Electric and recoil

Voltage regulator: Inverter

Run time: 6h 30

Consumption: 2. 95 Lt/h
Length: 848 mm
Width: 700 mm
Height: 721 mm
Weight (Kg): 118.1

The Rental Service

Hire a Generator Rental HONDA generator has never been easier: choose the product you want to rent and [fill out the form](#).

Our specialized rental service staff will respond immediately with the most suitable offer for you! The equipment available for rental can be shipped all over Italy and is always ready for action: our team of technicians ensures that it is always in perfect working condition. It is advisable to book in advance for the rental of large quantities of machines: this is especially important in conjunction with trade fairs or events, where many people will be using the rental service.

The Rental generator set for hire HONDA has been designed to achieve low noise and is among the quietest in its category as it has been designed with sound-insulating coatings and with the exclusive silencer of the exhaust system. The combination of lightweight materials such as magnesium, handles, and stable, smooth wheels make this portable genset extremely easy to move and maneuver.

The EU70is also built with a heavy-duty steel frame engine support system. These rubber shock absorbers, located on either side of the engine and angled at 45°, significantly reduce engine vibration from an already quiet machine. An advanced silencer system keeps the noise of this Rental generator set to an absolute minimum.

INVERTER VOLTAGE REGULATOR

The inverter technology voltage regulator ensures that the Rental HONDA EU70is genset delivers consistent, clean, uninterrupted power at a quality comparable to home. This way, thanks to the exclusive inverter voltage regulator, you can safely connect your sensitive devices (PCs, smartphones, appliances, etc.) to your generator set without burning them out. Inverter technology makes these generators ideal for hospitality facilities, emergency activities, sensitive electronics and lighting.

The ECO-Throttle built into the generator set, allows as the load increases, to automatically increase the generator RPM, so you will always have the power you need without straining the generator. This also allows you to save a lot of fuel. The large size of the tank combined with the efficiency of the engine, allow up to 6 hours of uninterrupted work, even in the case of high power performance.

The Rental Honda EU70is rental genset features an electronic fuel injection system, which increases fuel efficiency by up to 15%. Its new inverter technology contributes to these results by reducing power losses and increasing maximum output. In this way, the EU70is handles the initial power peaks required to start motorized equipment (such as air conditioners or refrigerators). The 19.2-liter tank and increased efficiency means the generator runs longer and more continuously. In fact, with reduced power consumption it can run for up to 12 hours!

The Rental Honda EU70is is the only inverter generator with a fuel-injected engine that allows simple push-button starting. The injection system offers greater fuel economy, easy starting, reduced maintenance and the same level of performance even when used at high altitudes. This system not only improves starting but also increases efficiency and reduces emissions.

ATS AUTOMATIC TRANSFER SWITCH

The EU70is rental generator set is prepared for connection to the [ATS11 automatic-start-squad](#). You won't have to worry about blackouts anymore because if the power goes out, this panel will automatically start the EU70is and allow you to continue your activity without losing your work data.

Product features:

Phase: Single phase

Maximum power single phase (KW): 7

Continuous power single phase (KW): 5.5

Maximum power single phase (KVA): 8.75

Continuous power single phase (KVA): 6.87

Fuel: Gasoline

Frequency (Hz): 50

Voltage (V): 230

Sockets configuration: 2 x 230V 16A 2P+T CEE - 1 x 230V 32A 2P+T CEE

Engine: Honda GX390, 4 stroke, OHV

Engine rpm (rpm): 3600

Ignition: Transistorized

Starting system: Manual / Electric

Engine capacity (cm³): 389

Number cylinders: 1
Oil capacity (L): 1.1
Cooling: Air
Alternator: Multipolar
Bore x stroke (mm): 88 x 64
Fuel tank capacity (L): 19.2
Consumption (L/h): 2.95
Running time (h): 6.5
Acoustic power: 90 dB(A)
Acoustic pressure: 76 dB(A)
Length (mm): 848
Width (mm): 700
Height (mm): 721
Dry weight (Kg): 118.1
Silenced: Yes
Super silenced: Yes
Product type: Generator
ATS Switch device : Optional
Voltage regulator: Inverter
Engine manufacturer: Honda
