**317.00 € tax excluded**

## Product description:

### HONDA UMC 435 E Versatool Brushcutters

Versatool HONDA UMC 435 E Brushcutter is a versatile garden tool with a double-belt harness. The Versatool HONDA UMC 435 E is designed to handle a huge variety of gardening tasks. With the ability to use eight different accessories, it is the total solution for all your garden care needs. The Versatool HONDA UMC 435 E Brushcutter is designed for a wide range of garden activities. With eight optional tools and a 4-stroke engine at the heart of the unit, the Versatool HONDA UMC 435 E is the ultimate tool for perfect gardening results.

The powerful 7000 rpm engine makes the Versatool HONDA UMC 435 E Brushcutter comfortable and easy to use. For example, the two-component anti-vibration clutch block removes vibrations from the motor thanks to a vibration absorber.

### Torque gears

The Versatool HONDA UMC 435 E Brushcutter also features a six-spline transmission shaft that optimizes torque and distributes power to each instrument in use. And with the same non-contact sealing bearings used by NASA, the Versatool tools have a longer service life.

### Green economy

The engines are the lightest and most compact in their class and incredibly easy to start thanks to a super-lightweight flywheel. They also provide high torque at low revs to tackle all garden activities with ease. Petrol engines avoid the confusion associated with mixing oil and fuel. In addition, they do not require a warm-up interval to achieve maximum performance. All this translates into excellent fuel economy and, as a result, greater fuel economy.
