Product description:

Watermaker Idromar MC1J

Watermaker Idromar MC1J belonging to the MINI COMPACT series is an excellent Watermaker with an hourly production of fresh water at 25°C equal to 65 litres/hour and a daily production at 25°C equal to 1500 litres/day.

The Idromar MC1J Watermaker is designed with high quality components with a simple operation.

With a fresh water production ranging from 65 to 180 lt/h, the Watermaker of the MINI COMPACT series are the Idromar proposal for medium-small boats (from 15 to 25 meters), where an intensive and continuous use is not always necessary. The Watermaker of this range are compact, in decomposable version and share the same functionality, practicality and homogeneity of materials. One of the main features that the Idromar MC1J Watermaker has in common with those of its range is the use of 316L stainless steel: from the small details such as bolts and nuts, the entire frame, the vessels containing the membranes and the high pressure pump head made of stainless steel to eliminate the phenomenon of corrosion.

The Idromar MC1J Watermaker provides a practical and reliable source of fresh water for yachtsmen with high supply requirements. The Idromar MC1J Watermaker offers you absolute water independence for various leisure activities such as long trips, ocean crossings or fishing.
