## **Product description:**

### **IDROMAR WATERMAKER MC2V**

Watermaker Idromar MC2V is part of the MINI COMPACT series and is an excellent Watermaker with an hourly production of fresh water at 25°C of 130 liters/hour and a daily production at 25°C of 3100 liters/day.

The Watermaker Idromar MC2V is designed with high quality components with a simple operation.

With a fresh water production that varies from 65 to 180 lt/h, the Watermaker of the MINI COMPACT series are the Idromar proposal for medium-small boats (from 15 to 25 meters), where an intensive and continuous use is not always necessary. The Watermaker of this range are compact, in decomposable version and share the same functionality, practicality and homogeneity of the materials.

One of the main features that the Idromar MC2V Watermaker has in common with those in its range is the use of 316L stainless steel: from the smallest details such as screws, bolts and nuts, the entire frame, the vessels that contain the membranes and the head of the high-pressure pump are made of stainless steel to eliminate the phenomenon of corrosion.

The Idromar MC2V Watermaker provides a practical and reliable source of fresh water for boaters with high supply requirements. The Watermaker Idromar MC2V offers you absolute independence from water for various diversions such as prolonged voyages, ocean crossings or fishing.

The continuous market demand has made the realization of the Watermaker strive with the design and development of the new Mini Compact Junior vertical version, same technical features, same ease of use but with an important difference in the measures.

## **Technical characteristics of the Watermaker Idromar MC2V:**

Hourly production at 25°C: 130 Lt/h

Daily production at 25°C: 3100 Lt/day  
Produced water salinity: 300/400 PPM  
Absorbed power: 1.5 KW  
Length: 350 mm  
Width: 350 mm  
Height: 700 mm  
Weight: 95 Kg

### Hydraulic connections

Sea suction: 1/2"  
Caskets suction: 1/2"  
Exhaust: 3/8"  
Outflow: 3/8"
