Product description:

IDROMAR WATERMAKER MC3V

Watermaker Idromar MC3V part of the MINI COMPACT series is an excellent Watermaker with an hourly production of fresh water at 25°C of 180 liters/hour and a daily production at 25°C of 4300 liters/day.

The Watermaker Idromar MC3V is designed and manufactured with high quality components with a simple operation.

With a fresh water production that varies from 65 to 180 liters/hour, the Watermaker of the MINI COMPACT series are the solution of Idromar for medium-small boats (15 to 25 meters), where an intensive and continuous use is not always necessary.

The Watermaker in this range, such as the Idromar MC3V, are compact, in a decomposable version, and share the same functionality, practicality and uniformity of materials. One of the main features that the Idromar MC3V Watermaker has in common with other Watermaker in its range is the use of 316L stainless steel: from the smallest details such as screws, bolts and nuts, the entire frame, the vessels that contain the membranes and the high pressure pump head are made of stainless steel to eliminate the phenomenon of corrosion.

The Idromar MC3V Watermaker provides a practical and reliable source of fresh water for boaters with high supply requirements. The Watermaker Idromar MC3V offers you absolute independence from water for various diversions such as prolonged voyages, ocean crossings or fishing.

The continuous market demand has made the realization of the Watermaker strive with the design and development of the new Mini Compact Junior vertical version, same technical features, same ease of use but with an important difference in the measures.

Technical characteristics of the Watermaker Idromar MC3V:

Hourly production at 25°C: 180 Lt/h

Daily production at 25°C: 4300 Lt/day
Produced water salinity: 300/400 PPM
Absorbed power: 1.5 KW
Length: 350 mm
Width: 350 mm
Height: 700 mm
Weight: 110 Kg

Hydraulic connections

Sea suction: 1/2"
Caskets suction: 1/2"
Exhaust: 3/8"
Outflow: 3/8"
