Product description:

ELE30 TANK FOR FLAMMABLE LIQUIDS AND FUEL CAPACITY 3000 LITRES

ELE30 is a large tank for flammable liquids and fuel, with horizontal axis, 2100 Litres capacity, suitable for storage, powering generators, burners and heating.

ELE30 is a cylindrical tank with horizontal or vertical axis in S235JR carbon steel sheet (UNI-EN 10025) with a thickness of 20/10 0 30/10 mm, externally treated against corrosion by pickling the sheets, zinc chrome anti-rust primer and finishing with bi-component enamel.

The painting of ELE30 is carried out in the spray booth with scrupulous reduction of polluting agents in respect of the environment.

ELE30 is complete with containment basin with a volumetric capacity equal to 110% of that of the tank.

TECHNICAL CHARACTERISTICS OF ELE30

Type of product. Tank for fuels and flammable materials

Axis: Horizontal

Capacity: 3000 Litres

Diameter: 1270 mm

Length: 2900 mm

width: 1400 mm

Height: 910 mm

With containment basin 110%

Product features:

Fluid type: Diesel

Diameter (Ø): 1270 mm

Tank capacity (L): 3000

Length (mm): 2900

Width (mm): 1400

Height (mm): 910

Oil fuel transfer pump: Optional
