Product description:

DOMETIC COOLAIR SP950I AIR CONDITIONER

DOMETIC COOLAIR SP950I is an air conditioner that offers flexibility and high cooling performance for all types of trucks. Installed on the rear wall of the cab, it leaves the roof space completely free.

Thanks to Dometic Coolair SP950I, any truck cab can be equipped with a stationary air-conditioning system, even those with rooftop units such as spoilers. The split system design allows the unit to be mounted on the rear interior wall of the cab instead of the roof. With a powerful 1000 W compressor that effectively chills and dehumidifies the air inside the vehicle, a pleasant temperature can be maintained even in a stationary position.

The DOMETIC COOLAIR SP950I air conditioner can be combined with the Dometic CoolAir SP950C compressor unit designed in case it is impossible to install the compressor on the roof, offering an alternative solution to refrigeration in the truck cab.

TECHNICAL CHARACTERISTICS of the DOMETIC COOLAIR SP950I CLIMATOR UNIT

Depth: 144.02 mm

Height: 277.88 mm

Width: 648.97 mm

Weight: 12kg

Input voltage (direct current): 24 V

Number of nozzles: 5

Cooling capacity (ISO 5151): 850 W

Power consumption - Cooling mode (ISO 5151): 530 W
