GENMAC CLICK RG5000HO GENERATOR 5,1KVA

The generator Genmac Click RG5000HO single phase has a Honda gasoline powered engine capable of delivering a power of 5,1KVA with the possibility of connection to optional AVR.

The Genmac Click RG5000HO single phase generator is equipped with a Honda engine powered by gasoline with a tank capacity of 5,3 liters for an autonomy of about three and a half hours, complete with manual recoil starter.

The generator is very light and makes it very easy to move for other uses, in addition for an even easier and more dynamic portability is possible the optional supply of a practical transport kit dedicated to this line of generators.

The Genmac 5,1KVA generator is portable of professional quality and you can ask for the supply with AVR.

Optional AVR regulator

The AVR brings a significant improvement in output voltage stability; this is particularly useful with commonly used machines with reactive load, such as refrigerators, freezers, air conditioners and garden machines. This will increase the life of your devices.

The optional AVR is a device that keeps the out voltage more constant and less load-dependent. Thanks to this technology there are fewer drops or current peaks and this makes it safer to use the various devices connected, improving their performance and durability.
