Product description:

EGM RP9000-SE THREEPHASE GENERATOR 7,5KW

The generator EGM RP9000-SE threephase is equipped with a gasoline engine capable of delivering 7,5KW power with optional AVR voltage regulator.

The RP9000-SE threephase EGM generator provides reliable power for home, work and leisure environments Safe powering of home appliances and other electronic devices Outdoor party solution.

The generator is easy to install and operate, as simple as starting and stopping with clear and intuitive controls (elettric start) Auto power off for low oil level Durable chassis.

The 7,5KW threephase generator is equipped with bolted, heavy duty wheels and hinged handle make it a robust and easy to transport. The recessed sockets with snap-on safety covers make it more secure.

The generator has a practical double-curved handle, which can be folded down for easy mobility and storage. EGM RP9000-SE has an all-steel construction and a large metal tank with fill indicator. The generator guarantees an efficient and silent operation thanks to the OHV engine that allows to deliver a maximum power of 7,5KW.

The AVR is indispensable to make the generator work at its best, it all needs an electronic control system, an AVR, which guarantees the good functioning of the machine and of the electrical network behind it.
