IDROMAR MC9S DUPLEX WATERMAKER 750Lt/h

The Watermaker IDROMAR MC9S DUPLEX is composed of two reverse osmosis plants in a single frame with the possibility of simultaneous or independent operation with capacity 750Lt/h

IDROMAR MC9S DUPLEX is an osmosis system recommended when the demand for drinking water by the user is not satisfied by a single system.

The Watermaker IDROMAR is a reverse osmosis plant with a capacity of 750Lt/h very compact and effective, thanks to its modular composition is easy to install and operate.

The Watermaker IDROMAR with a capacity of 750Lt/h is incredibly accessible to facilitate the operations of ordinary or extraordinary maintenance and therefore all the major work can be performed from the front panel.

It is also possible to design the unit with all components incorporated such as the prefeeding pump, sand filters and regeneration tank. The MC9S Duplex Watermaker clearly takes up more space but simplifies installation, and the entire unit is compact and aesthetically pleasing.

Osmotic units can work in separate or simultaneous mode. The data below is for 2 units working simultaneously. The osmosis system has numerous accessories that can be combined to improve its reliability, efficiency and facilitate its operation and accessibility.

The osmosis system has numerous accessories that can be combined to improve its reliability, efficiency and accessibility.
