## Product description:

### IRONSYSCTM CCT - 500/5 BRIDGE/COLUMN

IRONSYSCTM CCT - 500/5 is a jib/column crane consisting of a 270° manually rotating jib with a maximum capacity of 500 kg.

The cranes IRONSYSCTM MCT - 500/5 are an economic, simple and practical solution, generally used to serve single workstations. In order to simplify the work between the different working phases, it is also possible to use an overhead crane to connect the workstations and easily move the semi-finished or finished products.

The peculiarity of these plants is that they can adapt to cramped work areas and limited spaces where other plants could not be placed. Moreover, by guaranteeing multiple configurations, they can also be installed in structures with low ceilings, with particular obstacles or with specific requirements.

IRONSYSCTM CCT - 500/5 is equipped with ball bearings for rotation that allow it to rotate without tearing. The arm, made of a special press-bent channel profile, stable and light, ensures the best sensitivity of swinging and sliding of the carriage. The rigid structure of the column ensures the stability of the carriage during all the lifting phases.

In addition, the IRONSYSCTM CCT - 500/5 is equipped with adjustable disk brake with ferode, flat hoist power cable, "mushrooms" cable holder in plastic material, on-off switch.

IRONSYSCTM CCT - 500/5 respects the standard of painting is of the type to powder RAL1004, but can also be supplied hot galvanized or treated with specific cycles for external or marine environment, even highly aggressive.

The IRONSYSCTM crane is made to comply with the strictest safety standards both for small and medium-sized companies and for the industrial sector, guaranteeing reliability and safety in the

intended environment.

## TECHNICAL FEATURES IRONSYSTEM CCT - 500/5

Load capacity: 500 Kg

Arm: 5 m

Total height: 3.5 m

Underarm height: 2,750 m

## COMPONENTS

- Optagonal column in bent sheet metal.
- Tensioned arm in channel, rotating on ball bearings
- Adjustable disk brake with ferode.
- Flat wire for hoist feeding.
- Cable holder mushrooms in plastic material.
- On-Off switch.
- Powder coating.
