

VTE PAGURO 4SY G 115V 60Hz NO EPA

Product price:

5.986,00 € tax excluded

Product description:

VTE PAGURO 4SY G 115V 60Hz NO EPA

The PAGURO 4SY VTE is a 4 KVA single-phase generator, with a Yanmar diesel powered 3000 rpm engine and water cooled with stainless steel water/air heat exchanger.

All parts in contact with seawater are constructed of 316 L stainless steel.

Thanks to the water cooling and the double anti-vibration system, vibrations are reduced to a minimum making the VTE PAGURO 4SY **super-silenced** marine generator set among the lowest noise emissions in its category.

The compact and space-saving VTE PAGURO 4SY is suitable for use on small boats, the VTE PAGURO 4SY is ready to give you all the power you need with confidence.

Motor

The Yanmar diesel-powered engine makes the PAGURO generator set efficient and reliable. The generator set is designed with stainless steel water/air heat exchanger.

Alternator

The PAGURO 4SY generator set alternator is synchronous, brushless and with class H insulation. The **Capacitor regulation** makes it ideal for powering sensitive electronic devices that are sensitive to voltage and current fluctuations.

It is also water-cooled by means of an AISI 316 L stainless steel heat exchanger.

The alternator also includes a battery charger for a dedicated 12 V / 8 A starter battery.

Soundproofing capsule and double anti-vibration system

The reinforced fiberglass capsule with composite layering and the high-density soundproofing material coating make this generator set one of the most silent compared to its competitors. The capsule allows installation even in narrow spaces and this is due to its composition: two upper and one lower parts.

The **double anti-vibration system**, internal with 4 soft supports and external with 4 semi-elastic supports, finally makes the PAGURO 4SY genset stable even in less calm waters and silenced, so you can enjoy sailing without further worries.

For the PAGURO 4SY marine genset, the **installation-kit-with-separator** and the **installation-kit-with-final-silencer**.

If you are looking for another marine genset or another marine product besides PAGURO 4SY you can browse the entire catalog of marine gensets.

Product features:

Phase: Single phase

Continuous power single phase (KW): 3.5

Continuous power single phase (KVA): 4

Fuel: Diesel

Frequency (Hz): 60

Voltage (V): 115

Engine: Yanmar L70N5

Engine rpm (rpm): 3000

Starting system: Electric

Number cylinders: 1

Cooling: Stainless steel water/air heat exchanger

Alternator: Synchronous, brushless, capacitor regulation

Consumption (L/h): 0.35

Acoustic pressure: 53 dB(A)

Length (mm): 615

Width (mm): 435

Height (mm): 500

Dry weight (Kg): 90

Silenced: Yes

Super silenced: Yes

Engine manufacturer: Yanmar
