Product description:

VITRIFRIGO C75LX STAINLESS STEEL FRIDGE-FREEZER

VITRIFRIGO C75LX is a stainless steel refrigerator-freezer with a total capacity of 75 litres complete with freezer compartment and Steelock OCX2 locking system.

VITRIFRIGO C75LX meets all requirements in terms of space and capacity. Designed to transform the refrigerator into an elegant piece of furniture, it expresses a sober and refined style.

The VITRIFRIGO C75LX offers ample storage volume, up to a maximum of 75 litres, and remarkable ease of access at every point. The interior space can be optimally utilised thanks to the easily removable baskets.

The VITRIFRIGO C75LX is equipped with a square locking door in satin-finished stainless steel and polished finishing elements. With a single fixing profile it is possible to position the refrigerator in both the external and internal door versions, simply by moving the profile itself, which also has a concealed slot that optimises perimeter ventilation.

In the upper part of the VITRIFRIGO C75LX there is an element that allows you to adopt the "Vent Position", i.e. the possibility of leaving the door ajar when not in use, thus preventing the formation of mould and unpleasant odours.
